

GEOGRAPHY CURRICULUM LINKS

KS3

- Extend their locational knowledge and deepen their spatial awareness of the world's countries using maps of the world to focus on Africa, focusing on their environmental regions, key physical and human characteristics, countries and major cities
- Understand geographical similarities, differences and links between places through the study of human and physical geography of a region within Africa
- Understand how human and physical processes interact to influence, and change landscapes, environments and the climate; and how human activity relies on effective functioning of natural systems

KS4

AQA GCSE Geography:

- 3.1.2.1 Ecosystems
- 3.1.2.2 Tropical rainforests
- 3.2.2 The changing economic world
- 3.2.3.2 Food

Edexcel GCSE Geography

- 3.1 Large-Scale ecosystems are found in different parts of the world and are important
- 3.2 The biosphere is a vital system
- 3.4 Tropical Rainforest ecosystems show a range of distinguishing features
- 3.5 Tropical rainforest ecosystems provide a range of goods and services some of which are under threat
- 5.1 Definitions of Global Development vary as do attempts to measure it
- 5.2 The level of development varies globally
- 5.3 Uneven global development has a range of consequences
- 5.4 A range of strategies has been used to try to address uneven development
- 5.5 The level of development of the chosen developing or emerging country is influenced by its location and context in the world
- 5.6 The interactions of economic, social and demographic processes influence the development of the chosen developing or emerging country

OCR GCSE Geography A

- 2.1.1 Ecosystems consist of interdependent components
- 2.1.2 Ecosystems have distinct distributions and characteristics
- 2.1.3 There are major tropical rainforests in the world
- 2.1.5 Bio-diverse ecosystems are under threat from human activity
- 2.2.1 The world is developing unevenly
- 2.2.2 There are many causes of uneven development

OCR GCSE Geography B

- 4.1 Why are natural ecosystems important?
- 4.2 Why should tropical rainforests matter to us?
- 6.1 Why are some countries richer than others?
- 6.2 Are LIDC's likely to stay poor?
- 8.1 Will we run out of natural resources?

WJEC GCSE Geography

- 5.3.1 Where are large scale ecosystems found?
- 5.3.2 What are the key processes of ecosystems at different scales?
- 5.4.1 How do people use ecosystems and environments?
- 5.4.2 How do human activities modify processes and interactions within ecosystems?
- 5.4.3 How can ecosystems be managed sustainably?
- 6.1.1 How is economic development measured and what are contemporary global patterns?
- 7.1.1 How is social development measured?
- 7.2.1 What challenges face social development in Sub-Saharan Africa?
- 8.1.1 What are the impacts of increasing consumer choice on the global environment?
- 8.2.1 How can damaged environments and natural habitats be managed and restored?
